**DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/17/08 has been entered.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. It should be noted that the scope of claim 38 has been limited to a glove since applicant elected without traverse to limit the claimed invention to a glove. See applicant's election filed 3/5/04. Please amend claim 38 to reflect applicant's election.

4. Claims 27,28,29,30,31,32,38,39,41,42,43, and 44 are rejected under 35 U.S.C. 102(b) as being anticipated by Lindsay (USPN 732360). Lindsay teach the claimed product as evidenced by the entire specification, the patented claims, and the figures.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1791

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

6. Claims 35-37 and 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lindsay (USPN 732360). The above teachings of Lindsay are incorporated hereinafter. In regard to claims 35-37, additional layers well-known in the glove art for improved protection and aesthetic appeal. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to include the claimed additional layers in order to improve protection and aesthetic appeal. In regard to claim 40, the claimed material is well-known in the glove art. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the claimed material in the glove of Lindsay in order to form a durable and functional glove.

7. Claim 46 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lindsay (USPN 732360). The above teachings of Lindsay are incorporated hereinafter. In regard to claim 46, additional layers well-known in the glove art for improved protection and aesthetic appeal. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to include the claimed additional layers in order to improve protection and aesthetic appeal.

8. Applicant's arguments with respect to claims 27-32, 35-44, and 46 have been considered but are moot in view of the new ground(s) of rejection.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following US patents teach the state of the art: 6618861, 4070713, 5524294, and 2989755..
